

KUMOBITS AB · TWIN STICK SPACE ROGUELITE

Orbit Siege

Defend your planet. A twin stick roguelite with upgrades, boss waves and couch co-op.

PLAYABLE EARLY BUILD

NOVEMBER 2026

PLAY NOW kumobits.com/games/play/orbit-siege/

— THE IDEA

Defend your planet. A twin stick roguelite with upgrades, boss waves and couch co-op.

Orbit Siege puts you in orbit around a planet under attack. Hold off escalating waves, and between waves pick one of three upgrades that build on each other. Every fifth wave a boss tests your build.

A second player can drop in at any time on the same device, by keyboard, gamepad or a second touch. The planet's health is shared.

STATUS

Playable early build

PLATFORMS

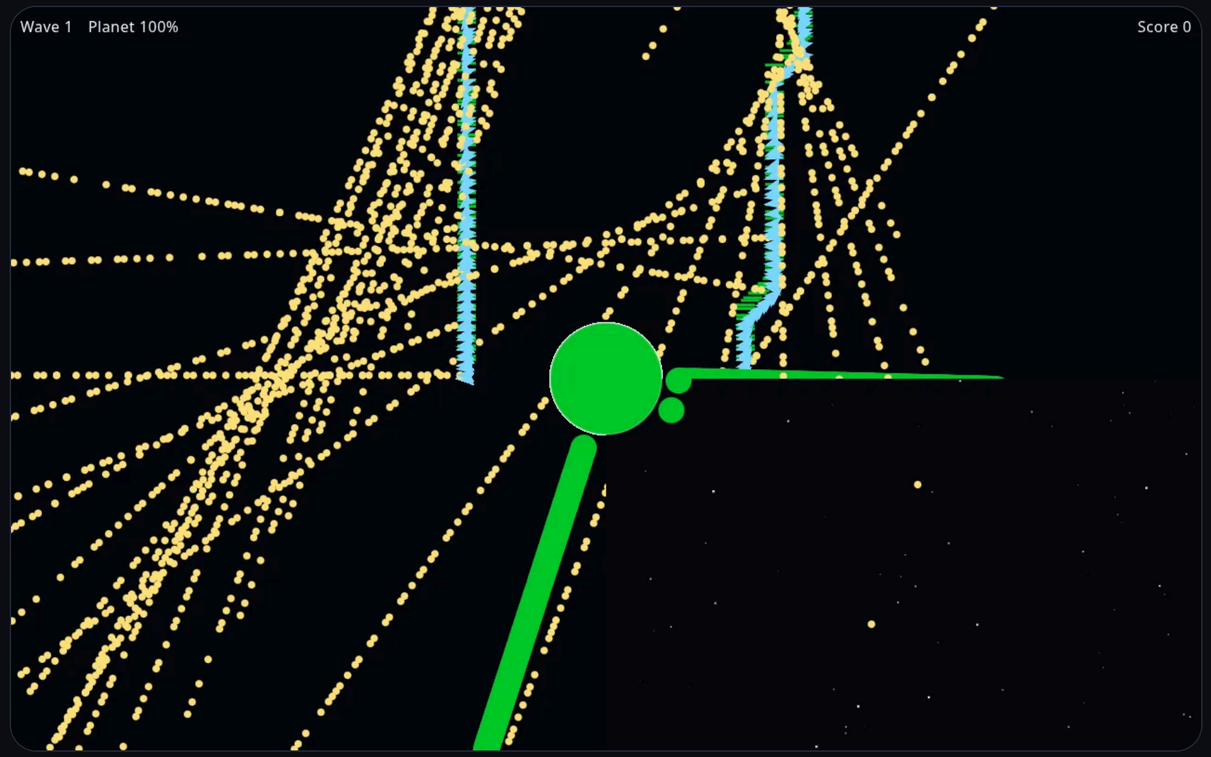

Browser on phones (dual touch sticks)
Browser on desktop (keyboard, mouse, gamepad)

BUILT WITH

TypeScript
Canvas 2D
Web Audio

— IN GAME

Orbit Siege, as it is today

A seeded daily challenge gives everyone the same waves that day, with its own high score table.

A wave in progress. In game capture from a software renderer.

HOW IT PLAYS

What it does

Pick 1 of 3

Synergizing upgrades between waves, a new build every run.

Boss every 5 waves

A boss checks whether your build holds up.

Couch co-op

Drop in on keyboard, gamepad or a second touch. Shared planet health.

Daily challenge

Same seed for everyone each day, with its own score table.

Juice

Screen shake, hit stop, particles and procedural sound and music.

Phone controls

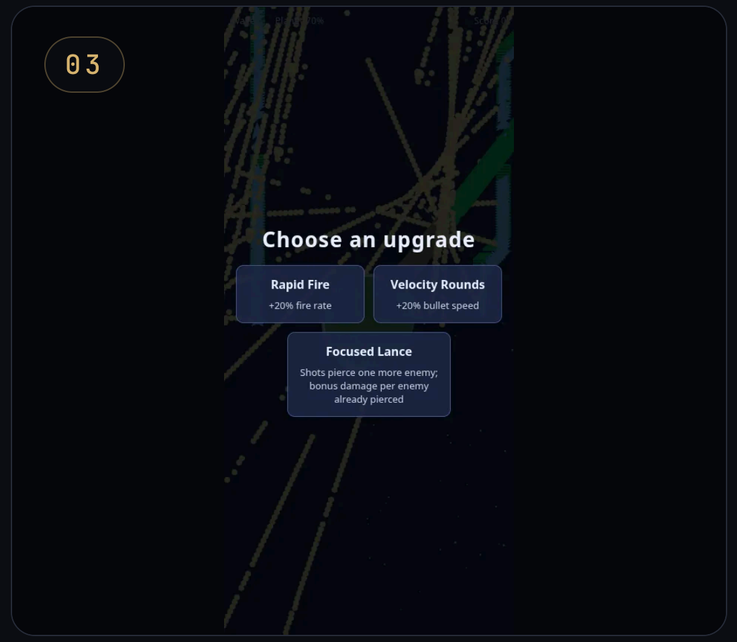

Dual virtual sticks: left half moves, right half aims and fires.

SCREENSHOTS

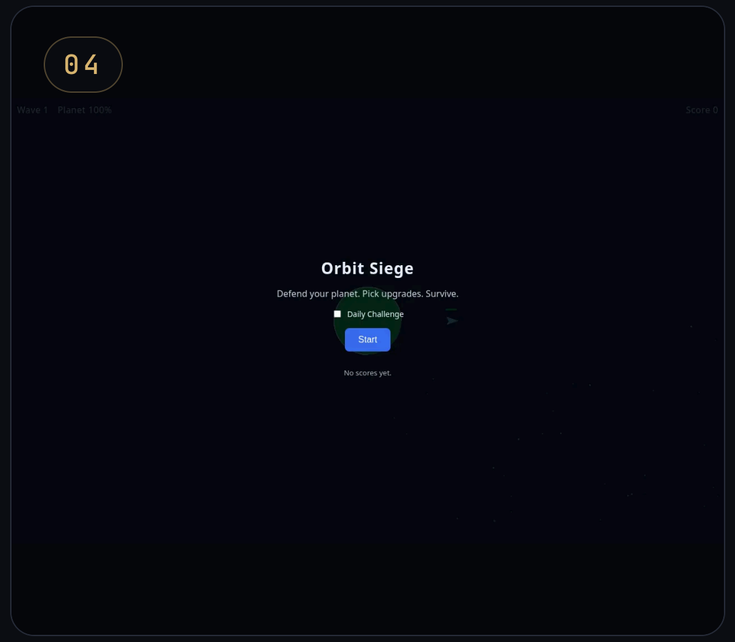

More from the build

Choose an upgrade between waves. In game capture.

Upgrade choice on a phone. In game capture.

Title screen with the daily challenge. In game capture.

— WHERE IT STANDS

Playable early build

Honest status: Early build. Captures were taken in a headless software renderer and look rougher than on a real device.
