KUMOBITS AB · OPEN CITY, VOXEL STYLE

Stockholm Sim

Walk and drive a blocky Stockholm, built from open map data.

PRE ALPHA

NOVEMBER 2026

PRODUCT PAGE kumobits.com/games/stockholm-sim/

— THE IDEA

Walk and drive a blocky Stockholm, built from open map data.

Stockholm Sim is a calm open city, seen as blocks. Streets, water and roofs come from open map data and are turned into voxels. Characters are pixelized and fictional.

You start on foot in Gamla stan. Walk, look around, or take the car parked nearby. Day turns to night, and you can pause whenever you want.

STATUS

Pre alpha

PLATFORMS

Windows PC first
VR (OpenXR) planned
Phone controls planned

BUILT WITH

Godot 4
OpenStreetMap data turned into voxels

— IN GAME

Stockholm Sim, as it is today

The first slice is one district, not all of Sweden. Combat is not part of it.

Top down output of our map converter: 124 buildings around Stortorget in Gamla stan. Map data from OpenStreetMap contributors, ODbL.

HOW IT PLAYS

What it does

A real city, as blocks

Gamla stan rebuilt from OpenStreetMap footprints, one metre cells, courtyards kept.

Walk or drive

First and third person on foot, plus an arcade car with headlights.

Day and night

A day and night cycle and a pause that never punishes you.

Normal and Advanced

A calm Normal mode for the first run, Advanced later for fuller play.

Readable

Large text, light and dark themes, and a short skippable guide.

Controls

Keyboard, mouse and gamepad. VR and phone controls are planned.

— WHERE IT STANDS

Pre alpha

Honest status: Pre alpha. Map data from OpenStreetMap contributors, available under the Open Database License. Buildings are simplified voxels, not photos. Characters are fictional.
